I am a Software Engineering Student. Interested in programming and software engineering. I like sports, mainly athletics and basketball and I am passionate about photography and videography..

Escola Secundária do Castelo da Maia - 19 out of 20

2016 - 2019, Maia, Porto.

FEUP / Degree in Software Engineering

2019 - 2022, Porto.

FEUP / Masters in Software Engineering

2022 - 2024, Porto.

Outstanding Projects

To loan or not to loan / FEUP - 4th Year

Data mining case study in the banking sector with the aim of predicting, looking at a number of factors, whether a loan will be repaid without delay. Data cleaning techniques, data normalization, different predictive models and parameter tuning using Grid Search were used.

Mancala / FEUP - 3rd Year

Development of an online version of a traditional African game, Mancala. The game has single-player and online multiplayer modes and was developed on the Web using HTML, CSS and Javascript for the front-end and NodeJS for the game server.

ProteinGram / FEUP - 3rd Year

Development of a Social Network using UML, PostgreSQL, Docker and Laravel. The entire project was developed applying Scrum techniques such as the development of artifacts and the organization of tasks in User Stories.
